# Overview

- BUG-01 – Multiple error messages displayed when login fails
- BUG-02 – User session is not shared across browser tabs
- BUG-03 – UI layout appears misaligned across multiple pages
- BUG-04 – Register page not accessible unless navigating through Forgot Password
- BUG-05 – Registration form shows “New Password” field incorrectly
- BUG-06 – Confirmation email is not sent during user registration
- BUG-07 – Home option is visible when user is not authenticated
- BUG-08 – Duplicate navigation options for EndSolvers / QA Challenge
- BUG-09 – First name and last name fields accept numeric values
- BUG-10 – User settings page lacks a cancel option
- BUG-11 – System allows creation of folders with empty name
- BUG-12 – System allows creation of folders with duplicate names
- BUG-13 – Deleting a folder with to-do items returns a 500 error
- BUG-14 – Folder selector has no placeholder
- BUG-15 – Exceeding character limits causes 500 error and data loss

# Bug Report:

**Bug ID:** BUG-01
**Title:** Multiple error messages displayed when login fails

**Related Use Case:** UC1 – Login
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is not authenticated.
- There are no saved credentials

---

**Steps to Reproduce**

1. Navigate to the Login page.
2. Enter invalid credentials
3. Submit the login form multiple times.

---

**Expected Result**

- A single error message is displayed indicating that login failed.

---

**Actual Result**

- Multiple error cards are displayed simultaneously on the screen.

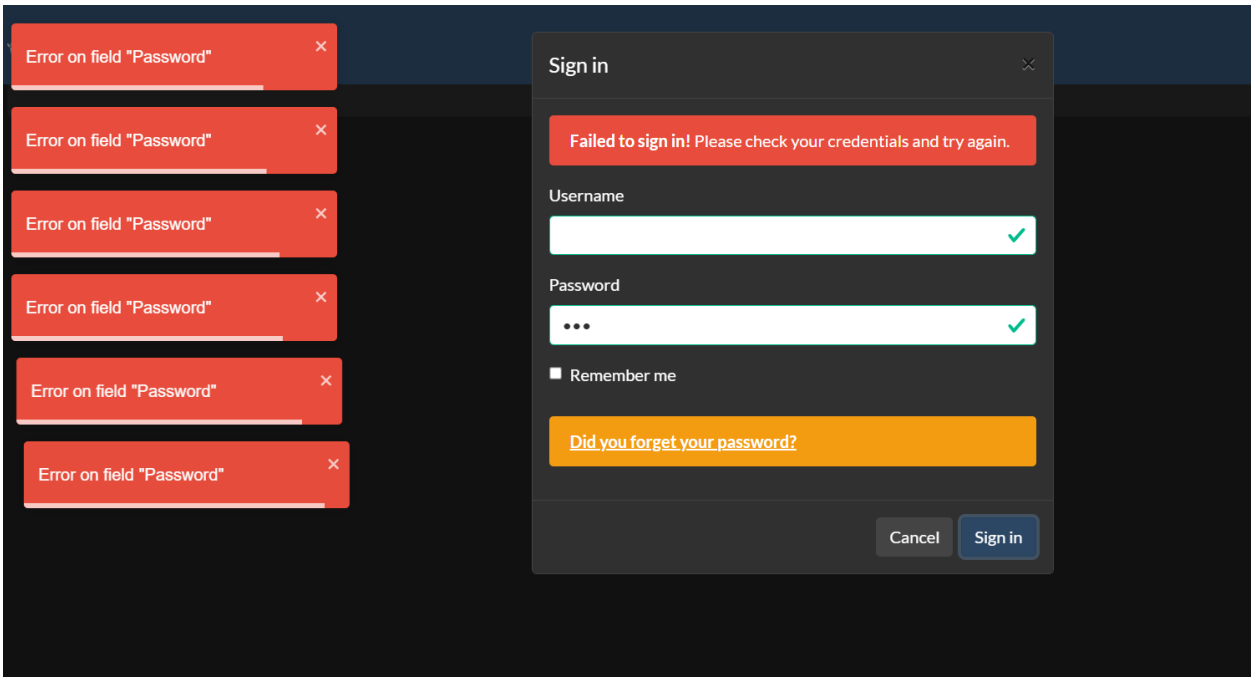
---

**Severity**

- Low

---

**Evidence**



---

**Notes**

- Error messages stack instead of being replaced, causing a poor user experience.

**Bug ID:** BUG-02
**Title:** User session is not shared across browser tabs

**Related Use Case:** UC1 – Login, UC4 – Home
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is authenticated.

---

**Steps to Reproduce**

1. Log in to the application
2. Open a new browser tab.
3. Access the application URL in the new tab.

---

**Expected Result**

- The user session should remain active and the user should be authenticated across all browser tabs.

---

**Actual Result**

- The user is not authenticated in the new tab and must log in again.

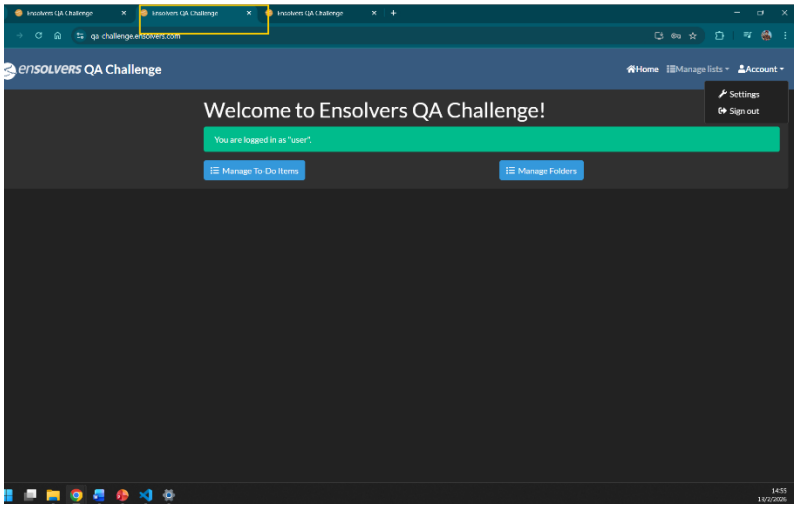
---

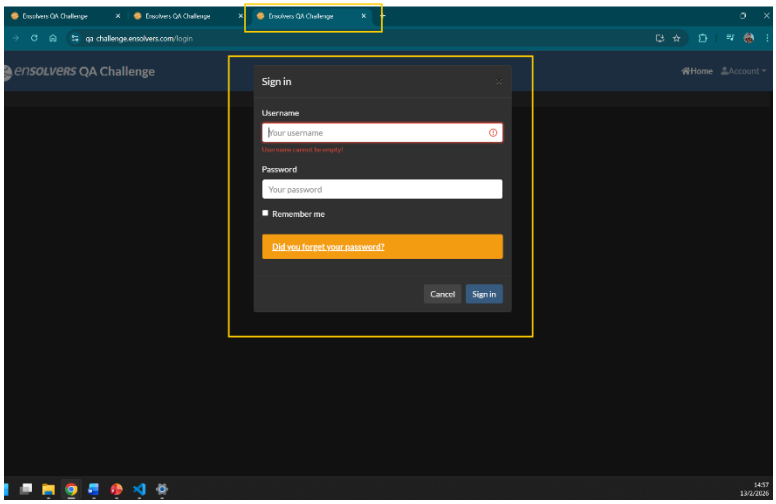
**Severity**

- High

---

**Evidence**





**Bug ID:** BUG-03
**Title:** UI layout appears misaligned across multiple pages

**Related Use Case:** UC1 – Login / UC2 – Password Recovery / UC3 – User Registration / UC4 – Home Page Access / UC5 – Access and Edit Settings

**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User may be authenticated or unauthenticated

---

**Steps to Reproduce**

1. Navigate through different pages of the application (Login, Register, Password Recovery, Home, Settings).

---

**Expected Result**

UI elements should be properly aligned, spaced consistently, and visually clear across all pages.

---

**Actual Result**

- UI elements appear misaligned, with icons and components too close to each other, resulting in a visually broken and inconsistent layout

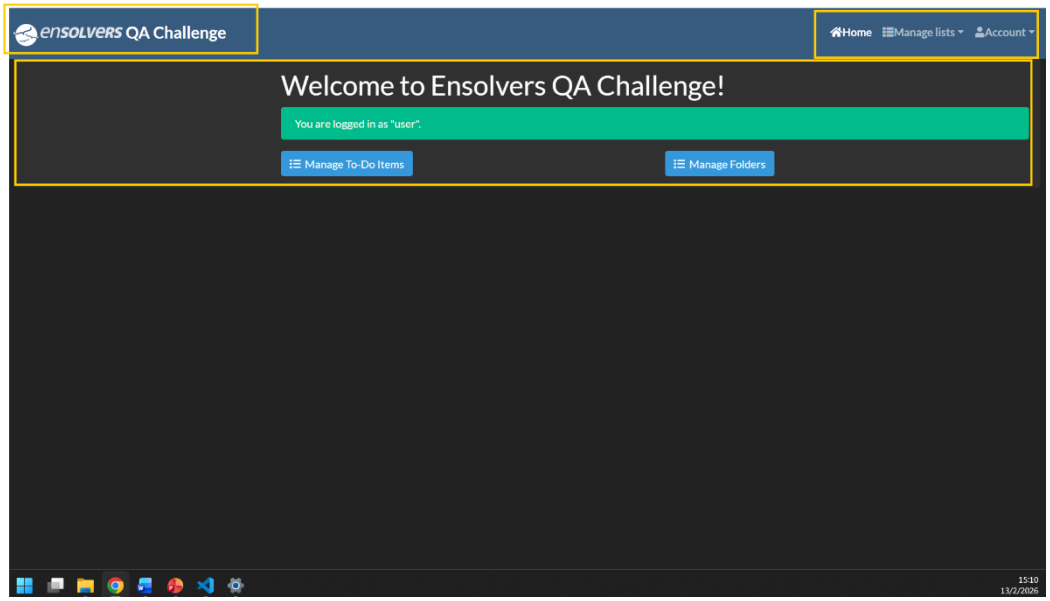
---

**Severity**

- Low

---

**Evidence**



**Bug ID:** BUG-04
**Title:** Register page not accessible unless navigating through Forgot Password

**Related Use Case:** UC3 – User Registration
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is not authenticated.

---

**Steps to Reproduce**

1. Open the Login page.
2. Try to access the Register page using the navigation bar.

---

**Expected Result**

- Register page should be directly accessible.

---

**Actual Result**

- Register option is only available after navigating through Forgot Password.

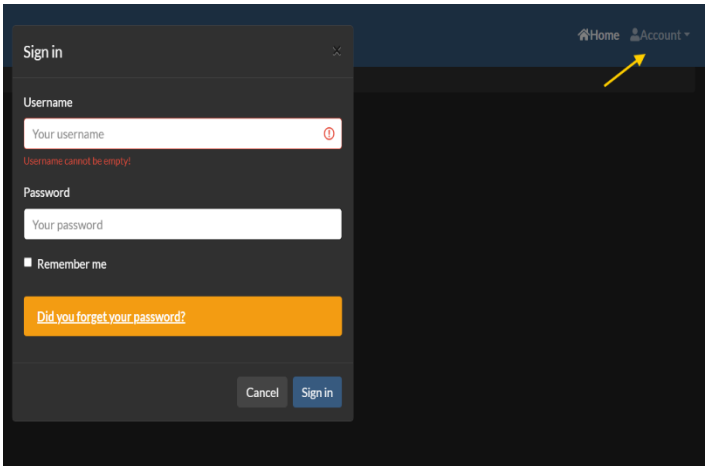
---

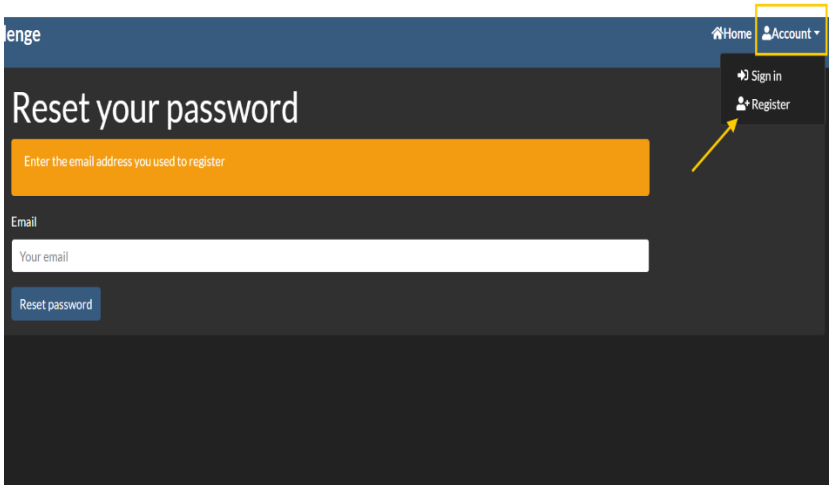
**Severity**

- High

---

**Evidence**





**Bug ID:** BUG-05
**Title:** Registration form shows “New Password” field incorrectly

**Related Use Case:** UC3 – User Registration
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is not authenticated.

---

**Steps to Reproduce**

1. Navigate to the Register page.

---

**Expected Result**

- Registration form should only request a password and confirmation.

---

**Actual Result**

- A “New Password” field is displayed, which is confusing in this context.

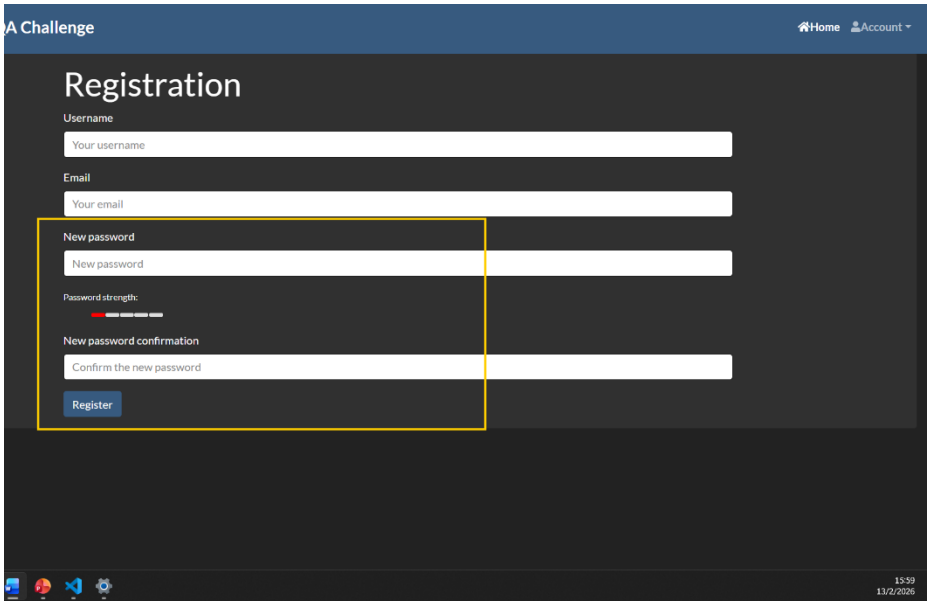
---

**Severity**

- Low

---

**Evidence**



**Bug ID:** BUG-06
**Title:** Confirmation email is not sent during user registration

**Related Use Case:** UC3 – User Registration
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User attempts to register a new account.

---

**Steps to Reproduce**

1. Complete the registration form with valid data.
2. Submit the form.

---

**Expected Result**

- A confirmation email should be sent to the user.

---

**Actual Result**

- No confirmation email is sent, preventing account activation.

---

**Severity**

- High

**Bug ID:** BUG-05
**Title:** Home option is visible when user is not authenticated

**Related Use Case:** UC4 – Home Page Access
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is not authenticated.

---

**Steps to Reproduce**

1. Open the application.

---

**Expected Result**

- Home option should not be available for unauthenticated users.

---

**Actual Result**

- Home button is visible from login page and visible and clickable from register page and recovery password page.

---

**Severity**

- Low

---

**Evidence**

**Bug ID:** BUG-06
**Title:** Duplicate navigation options for EndSolvers / QA Challenge
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- Application is loaded.

---

**Steps to Reproduce**

1. Observe the navigation bar.

---

**Expected Result**

- A single navigation option should be displayed to access the home page.

---

**Actual Result**

- Two separate clickable navigation options ("EndSolvers" and "QA Challenge") are displayed, both leading to the same destination

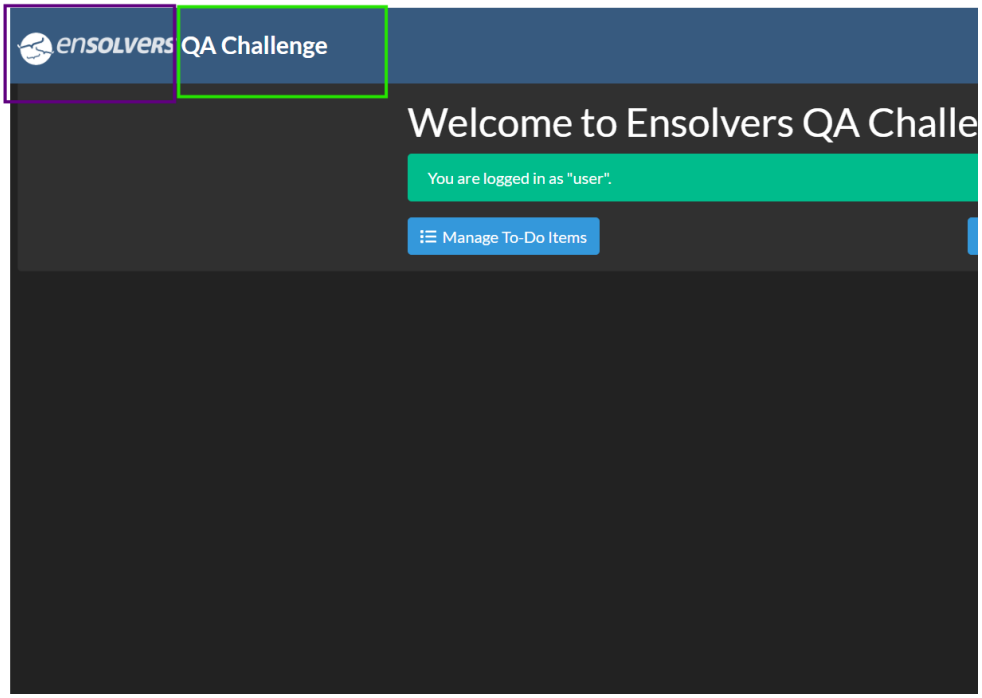
---

**Severity**

- Low

---

**Evidence**



**Bug ID:** BUG-07
**Title:** First name and last name fields accept numeric values

**Related Use Case:** UC5 –Edit Settings
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is authenticated.

---

**Steps to Reproduce**

1. Navigate to Settings.
2. Enter numeric values in first name or last name.
3. Save changes

---

**Expected Result**

- System should reject numeric values.

---

**Actual Result**

- Numeric values are accepted.

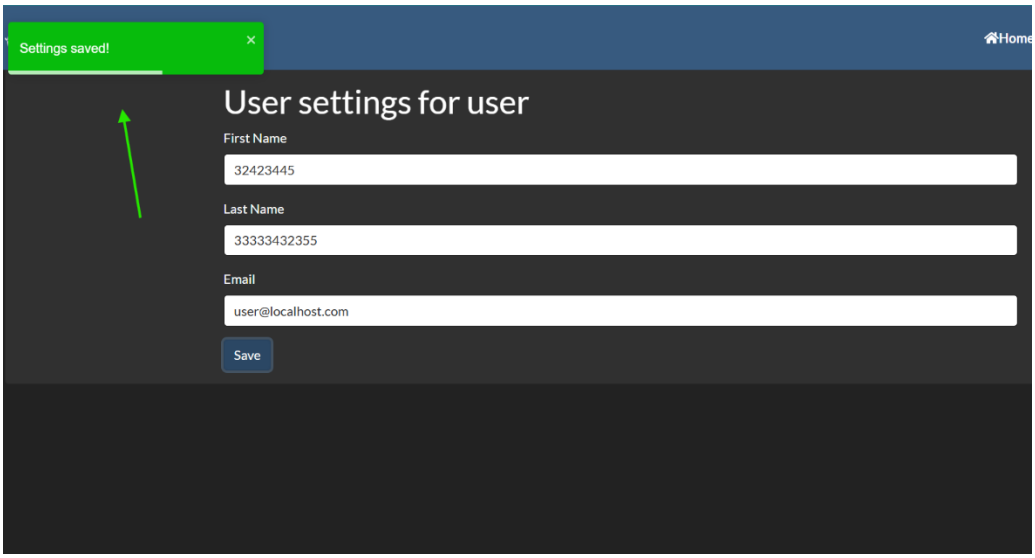
---

**Severity**

- Medium

---

**Evidence**



**Bug ID:** BUG-08
**Title:** User settings page lacks a cancel option

**Related Use Case:** UC5 –Edit Settings
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is authenticated.

---

**Steps to Reproduce**

1. Navigate to Settings.

---

**Expected Result**

- The user can cancel the changes by clicking a Cancel button on the screen, and all unsaved changes are discarded.

---

**Actual Result**

- There is no Cancel button available.
- The only way to cancel changes is by navigating away using the navbar.

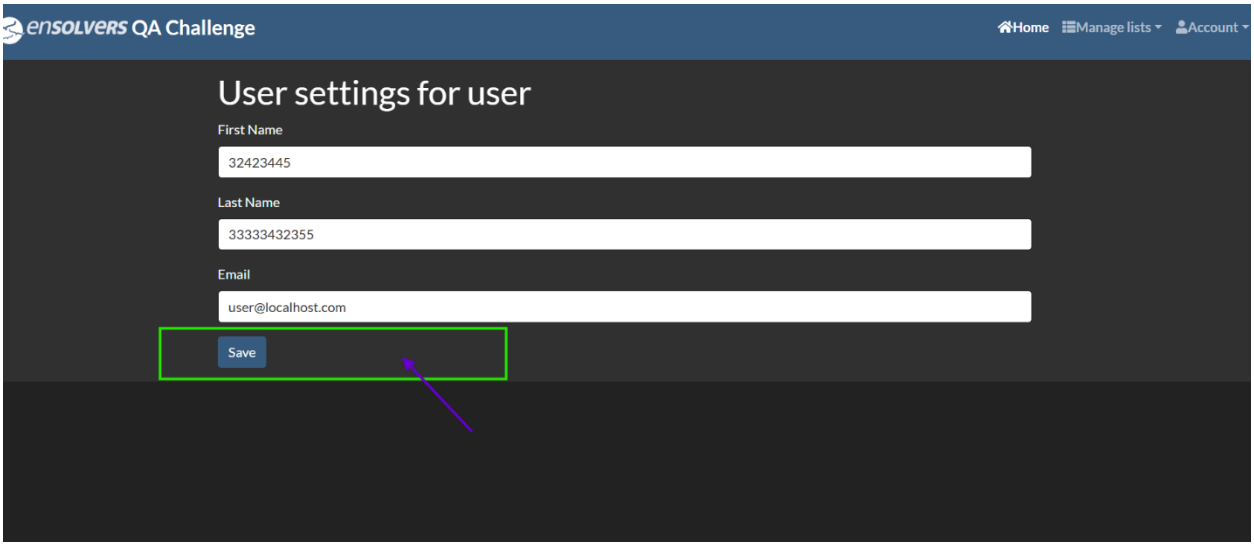
---

**Severity**

- Low

---

**Evidence**



**Bug ID:** BUG-09
**Title:** System allows creation of folders with empty name

**Related Use Case:** UC7 – Create Folder
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is  authenticated.

---

**Steps to Reproduce**

1. Navigate to Create Folder.
2. Leave name empty.
3. Save

---

**Expected Result**

- Folder should not be created.

---

**Actual Result**

- Folder is created with empty name.

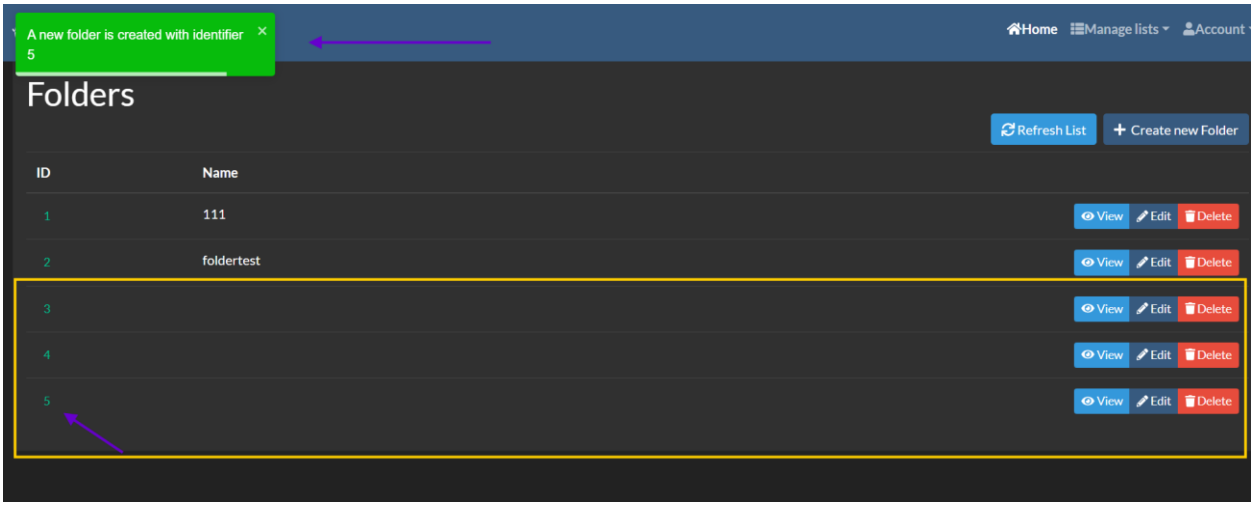
---

**Severity**

- High

---

**Evidence**



**Bug ID:** BUG-10
**Title:** System allows creation of folders with duplicate names

**Related Use Case:** UC7 – Create Folder
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is  authenticated.
- User is on the Manage Folders page.

---

**Steps to Reproduce**

1. Create a new folder with a valid name
2. Create another folder using the same name

---

**Expected Result**

- The system should prevent the creation of folders with duplicate names and display an error message.

---

**Actual Result**

- The folder is created successfully with a duplicate name.

---

**Severity**

- Medium

---

**Evidence**

**Bug ID:** BUG-11
**Title:** Deleting a folder with to-do items returns a 500 error

**Related Use Case:** UC9 – Delete Folder
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is  authenticated.
- A folder exists with at least one to-do item assigned.

---

**Steps to Reproduce**

1. Navigate to the Manage Folders page
2. Attempt to delete a folder that contains a to-do item.
3. Confirm the deletion.

---

**Expected Result**

- A descriptive and user-friendly error message should be displayed, indicating that the folder cannot be deleted.

---

**Actual Result**

- A 500 Internal Server Error is returne

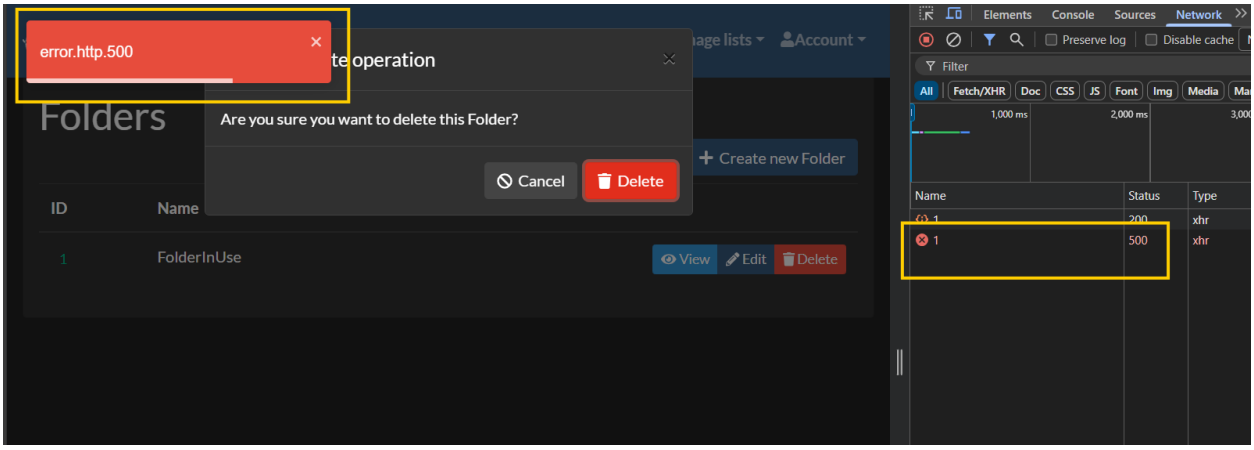
---

**Severity**

High

---

**Evidence**



**Bug ID:** BUG-11
**Title:** Deleting a folder with to-do items returns a 500 error

**Related Use Case:** UC9 – Delete Folder
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is  authenticated.
- A folder exists with at least one to-do item assigned.

---

**Steps to Reproduce**

4. Navigate to the Manage Folders page
5. Attempt to delete a folder that contains a to-do item.
6. Confirm the deletion.

---

**Expected Result**

- A descriptive and user-friendly error message should be displayed, indicating that the folder cannot be deleted.

---

**Actual Result**

- A 500 Internal Server Error is returne

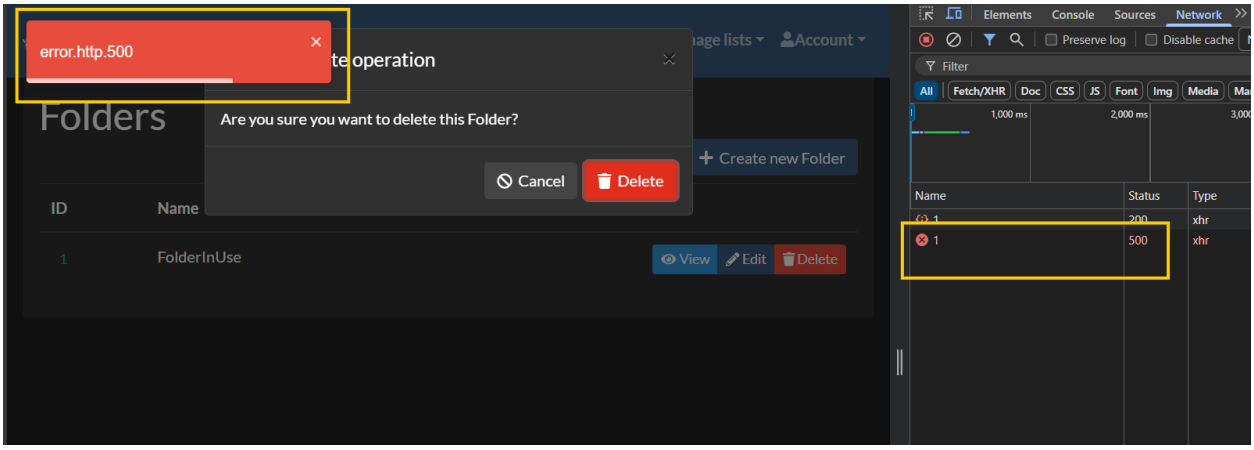
---

**Severity**

High

---

**Evidence**



**Bug ID:** BUG-12
**Title:** Folder selector has no placeholder

**Related Use Case:** UC11 – Create To-Do Item
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is  authenticated.
- User is on the Create To-Do Item page.

---

**Steps to Reproduce**

1. Open the folder selection dropdown when creating a to-do item

---

**Expected Result**

- The select should display a placeholder indicating that no folder is selected

---

**Actual Result**

- No placeholder is shown.

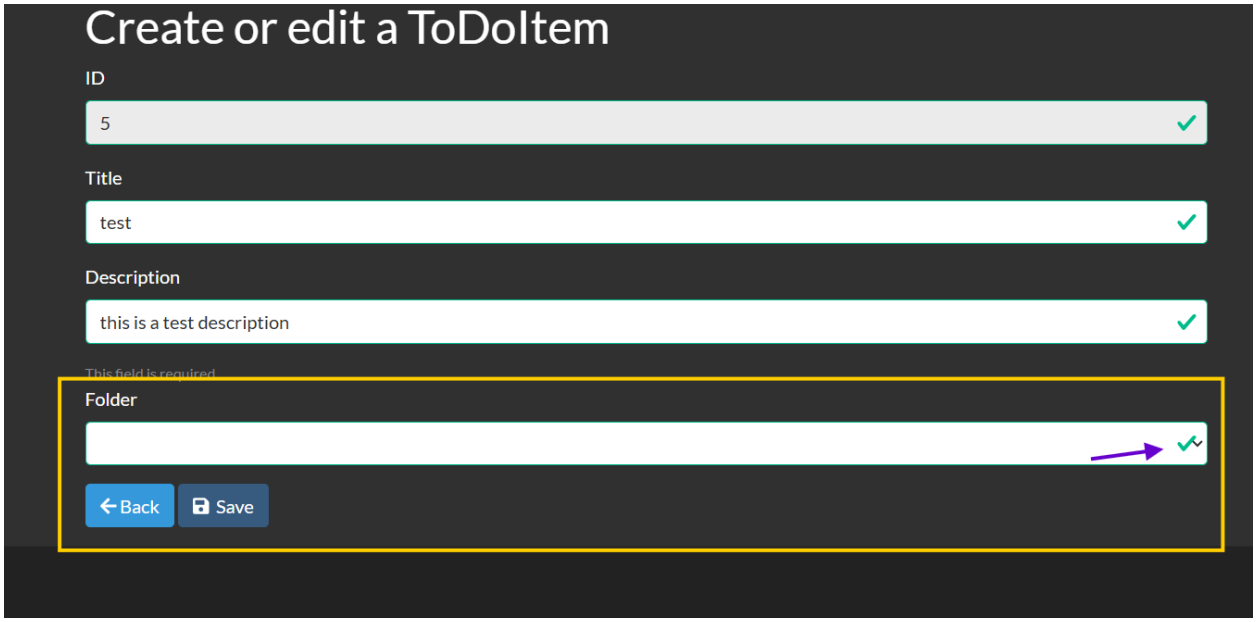
---

**Severity**

Low

---

**Evidence**



**Bug ID:** BUG-13
**Title:** Folder selector displays folder IDs instead of names

**Related Use Case:** UC11 – Create To-Do Item
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is  authenticated.
- One or more folders exist.
- User is on the Create To-Do Item page.

---

**Steps to Reproduce**

1. Open the folder selection dropdown.

---

**Expected Result**

- Folder names should be displayed in the selector.

---

**Actual Result**

- Folder IDs are displayed instead of folder names.

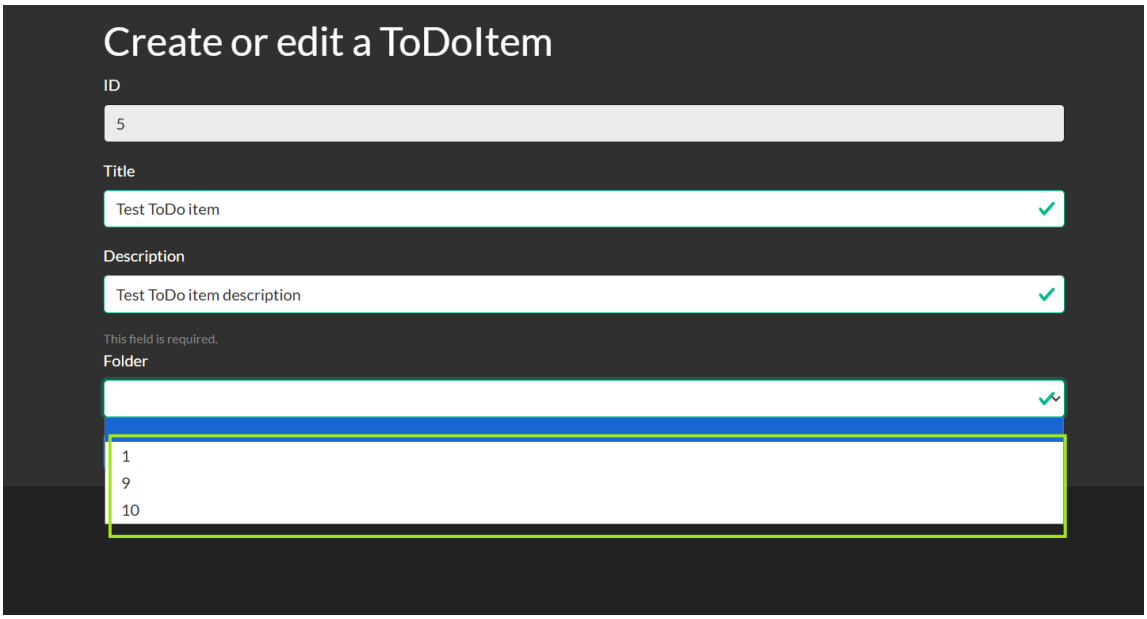
---

**Severity**

Medium

---

**Evidence**



**Bug ID:** BUG-14
**Title:** To-do item can be assigned to an invalid empty folder

**Related Use Case:** UC11 – Create To-Do Item
**Environment:** Web Application – QA Challenge

---

**Preconditions**

- User is  authenticated.
- No folders have been created.
- User is on the Create To-Do Item page.

---

**Steps to Reproduce**

1. Create or edit a to-do item.
2. Attempt to select a folder from the folder selector
3. Save the to-do item

---

**Expected Result**

- The system should prevent assigning a to-do item when no valid folders exist and display a validation message

---

**Actual Result**

- The system assigns a non-existing folder ID to the to-do item.

---

**Severity**

High

---

**Evidence**

**Bug ID:** BUG-15
**Title:** Exceeding character limits causes 500 error and data loss

**Related Use Case:** UC11 – Create To-Do Item
**Environment:** Web Application – QA Challenge

---

### Preconditions

- User is  authenticated.
- No folders have been created.
- User is on the Create To-Do Item page.

---

### Steps to Reproduce

1. Enter a title or description exceeding the allowed character limit.
2. Attempt to save the to-do item.

---

### Expected Result

- A validation message should be displayed indicating the character limit, and entered data should be preserved.

---

### Actual Result

- A 500 Internal Server Error occurs and the description field is cleared.
